The Honeywell Aerospace Supplier Survey Committee has made revisions to the APSL that impact your facility. These may be approvals, disapprovals, or some other correction.

Please Note: Approvals, disapprovals, rejections and corrections listed below. It may not affect all sub-approval details.

It is your responsibility to access the APSL and verify that your facility is properly represented.

FYI: If you have been approved to a specification, please be aware that your approval will be converted to an approval code in the near future and no new notification will be sent out.

This revision affects the following specifications:

New Approvals:

LHP6116

Extension to Current Approvals:

AMS 2685, AMS 2689, AMS-STD-2219, AWS D17.1, GPS4100-1, MIL-STD-2219, WBS5018

Any approvals are contingent upon your company's ability to comply with the requirements as dictated by the contract/specification. If you cannot find one of the above specifications on your current APSL listing, the approval has been revoked. The change applies to the following CAGE CODES: 99193, 91547, 64643, 9AA11, 06848, 34270, 07213, 55284, 59364, 077L2, 60187, 3H335, 00670, 07217, 70210, 04795, 64547, 83298, U1605, 017N4,
